Q: What is a Fast Play Progressive Jackpot Game?

A: *Fast Play progressive games are a series of games that all share the same name, appearance and playstyle, but are available at different price points (wager amounts). Each game in a series contributes to ONE progressive jackpot. The progressive jackpot begins with a set minimum value. Once the minimum value is fully funded, the progressive jackpot grows and grows with each ticket sold statewide until someone wins. The progressive jackpot then resets to the minimum value, and begins to grow again after the minimum value is funded. Each Fast Play progressive game is eligible to win a percentage of the progressive jackpot. The ticket price (wager amounts) you play determines the percentage of the progressive jackpot you could win. For example: A \$1 ticket wins 20% of the progressive jackpot; a \$2 ticket wins 40% of the progressive jackpot and a \$5 ticket wins 100% of the progressive jackpot.*
