VIII. GAME PRIZE PAYOUTS AND PRIZE LEVELS.

The "Connecticut Lucky-4-Life" game is a set and split prize payout game with winning tickets determined by matching four (4) numbers from a field of thirty-nine (39) numbers in any order plus one (1) number from a separate and distinct field of thirty-nine (39) numbers. The following paragraphs and charts define the prize payouts, prize formats, prize pool percentages and chances of winning per prize level.

A. PRIZE PAYOUTS. There shall be 8 prize level pools for the “Connecticut Lucky-4-Life” game.

1. The top prize will be annuitized and based on a set prize liability that will be split equally if there are multiple winners. Under no circumstances, however, will the top prize fall below a minimum prize value of \$250/week for life. The remaining seven prize levels are set prizes with the exception of the second prize that also may revert to a split payout in the event that there are more than ten (10) winning tickets of the prize.
 - The top prize (\$2,000 a week for life) is based on a set prize liability but, if there are two or more winners of the top prize, the prize amount will be divided equally among the number of winning tickets or plays winning the prize.
 - The top prize will be paid as an annuity with no lump sum cash option applicable.
 - Top prize winner(s) will be paid weekly. Prize payments will be net of all appropriate taxes.
 - In the event that the top prize is split among multiple winners, the prize amount will be rounded to the nearest whole dollar.
 - The winner(s) of the top prize and their beneficiaries will be paid their appropriate top prize share on a weekly basis for a minimum period of twenty (20) years or 1,043 weeks. The first top prize payment will be made when the prize is claimed at Lottery Headquarters; subsequent top prize payments will be made weekly thereafter.
 - The minimum top prize value will be \$250 per week for life.
2. The second prize will be paid as a \$10,000 set prize unless and until there are more than ten winners of this prize level. In this case, the total prize liability of \$100,000 (\$10,000 per prize multiplied by ten winners) will be divided equally among the number of winners of this prize level. The minimum prize amount for the second prize will be \$1,000 regardless of the number of winners. Prizes will be rounded to the nearest whole dollar and will be paid in one single lump sum payment.

3. Prize Level 3 through Prize Level 8 will be paid as set prizes. All winners shall be paid in one single lump sum payment

B. PRIZE LEVELS.

1. **Prize Level 1 - \$2,000/ Week for life.** Winners matching all four (4) of the winning numbers in the first matrix in any order and one (1) winning number in the second matrix will equally share the top prize of \$2,000 a week for life. The top prize will be paid weekly. When it is won, the top prize pool will be set at \$1,815,840 (equal to 28.30361% of Lucky-4-Life sales applicable to said drawing plus any amount carried-in and/or adjusted by unclaimed lottery prizes) and will fund the Lucky-4-Life annuity purchase.
 - If there are no top prize winners in any drawing, the top prize pool amount will be carried forward to the next drawing. This carry-in process will continue until there is a top prize winner or until the top prize pool reaches a maximum value of \$1,815,840.
 - If there continues to be no top prize winner as the top prize pool approaches its maximum, for that drawing in which the full allocated (28.30361%) top prize pool plus amount carried-in will exceed the maximum amount of \$1,815,840, a reduced allocation will be used to bring the prize pool to the maximum amount. No additions will be made from future pools until the top prize is won.
 - If the top prize is won before the maximum pool value amount is reached, the top prize will be calculated as the current top prize pool plus the carry-in pool (if available) plus unclaimed lottery prize money (as necessary) to equal \$1,815,840.
 - The first level prize pool will be adjusted by the system if the number of winners in the top prize pools results in a payout prize that falls below \$250/week for life. The pool adjustment will equal the amount needed to bring the calculated per ticket payout to \$250/week for life. **(Note: In this scenario, the total prize liability may exceed \$1,815,840.)**

2. **Prize Level 2 - \$10,000.** Winners matching four (4) of the winning numbers in the first matrix in any order and zero (0) numbers in the second matrix will win a set prize of \$10,000. If there are more than ten (10) winners of this prize level, the winners will equally share the total prize liability of \$100,000. The second prize pool is equal to 5.92308% of Lucky-4-Life sales applicable to said drawing and/or adjusted by unclaimed lottery prizes.
 - The second level prize pool will be adjusted by the system if the number of winners in the prize pool results in a payout prize that falls below \$1000. The pool adjustment will equal the amount needed to bring the calculated per ticket payout to \$1,000. **(Note: In this scenario, the total prize liability may exceed \$100,000).**
 - If there are no winners in the second-level prize pool, the money in the second prize pool will not be carried forward and will not be added to future prize level pools.
3. **Prize Level 3 - \$500.** Winners matching three (3) of the winning numbers in the first matrix in any order and one (1) number in the second matrix will win a set prize of \$500. The third prize pool is equal to 1.09109% of Lucky-4-Life sales applicable to said drawing and shall be funded by Lucky-4-Life sales proceeds and/or unclaimed lottery prizes, as determined by the CLC.
