(a) First Prize. The KICKER feature does not apply to the first prize level.

(b) Second Prize. Winner(s) matching four (4) of the winning numbers in any order PLUS the KICKER number will equally share the second level prize pool, after the formula has been applied.

In the event that the total value of prizes won for any “Connecticut CASH5” drawing (number of prizes won multiplied by the fixed payout amounts) exceeds three hundred fifty percent (350%) of the CASH5 sales, the prize amounts will be based upon the following formula:

\[
\text{Total Number of 5-Match Winners} \times \text{\$100,000.} = A \\
\text{Total Number of 4-Match Winners} \times \text{\$300.} = B \\
\text{Total Number of 3-Match Winners} \times \text{\$10.} = C \\
\]

Then \( A + B + C = X \)

\[
\begin{align*}
A \text{ Divided by } X &= \text{Proportion of Available Prize Money Allocated to 5-Match Winners} \\
B \text{ Divided by } X &= \text{Proportion of Available Prize Money Allocated to 4-Match Winners} \\
C \text{ Divided by } X &= \text{Proportion of Available Prize Money Allocated to 3-Match Winners}
\end{align*}
\]

Winner Type | Prize Structure
-------------|---------------------------------------------------------
5 of 5       | \[
\text{[(3.5 x Sales) Multiplied by (A/X)] Divided by Number of Winners = Prize Per Winner}
\]
4 of 5       | \[
\text{[(3.5 x Sales) Multiplied by (B/X)] Divided by Number of Winners = Prize Per Winner}
\]
3 of 5       | \[
\text{[(3.5 x Sales) Multiplied by (C/X)] Divided by Number of Winners = Prize Per Winner}
\]
“Connecticut CASH5” With KICKER

In the event that the total value of prizes won for the KICKER portion of any “CASH5” drawing (number of prizes won multiplied by the fixed payout amounts) exceeds three hundred fifty percent (350%) of the KICKER sales, the prizes amounts for the KICKER portion of the CASH5 game will be based upon the following formula:

\[
\begin{align*}
\text{Total number of 4-match winners} & \quad + \quad \text{KICKER} \times \$4,350. \quad = \quad D \\
\text{Total number of 3-match winners} & \quad + \quad \text{KICKER} \times \$65. \quad = \quad E \\
\text{Total number of 2-match winners} & \quad + \quad \text{KICKER} \times \$5. \quad = \quad F \\
\text{Total number of 1-match winners} & \quad + \quad \text{KICKER} \times \$2. \quad = \quad G
\end{align*}
\]

Then \( D + E + F + G = Y \)
